

Assignment 1: SDLC Overview - Create a one-page infographic that outlines the SDLC phases (Requirements, Design, Implementation, Testing, Deployment), highlighting the importance of each phase and how they interconnect.

Interconnectivity:

- Requirements & Design: Design is based on gathered requirements, ensuring the solution aligns with client needs.
- Design & Implementation: Design informs the coding process, guiding developers in realizing the envisioned system.
- Implementation & Testing: Implemented code undergoes testing to validate functionality against requirements and design.
- Testing & Deployment: Successful testing ensures the product is ready for deployment, minimizing post-deployment issues.
